The exceptionally rapid development of microcomputer technology. the purpose of the hardware processor. there are various types of general-purpose CPU. the one-chip microcomputer. a digital signal processor (DSP). the system-on-a-chip (SOC). and a dedicated processor chip. there are multiple vendors the corresponding products to choose from. and new processor chip continues to emerge. We think that can be taken from the particular to the general learning methods. select a typical processor (CPU. MCU or DSP). conscientiously study and grasp the basic concepts and basic methods. Mastered a typical processor. and then migrated to other types of processors it is easy to grasp. This is because their basic concepts. ideas and methods are the same. the similarities are very strong. The same time. in order to be able to describe the basic problem in the limited time clear. it should be a relatively simple processor as an example to explain the concept of complex (too complex processor the unfit shorter classroom teaching). For this reason. the the colleges computer professional...
