Taylor Francis Ltd, United Kingdom, 2005. Hardback. Book Condition: New. 234 x 160 mm. Language: English . Brand New Book ***** Print on Demand *****.Rethinking the Welfare State offers a comprehensive and comparative analysis of social welfare policy in an international context, with a particular emphasis on the US and Canada. The authors investigate the claim that a decentralized delivery of government supported goods and services enables policy objectives to be achieved in a more innovative and efficient way, but at a lower cost. Secondly they examine the effectiveness of the voucher system as a solution to problematic welfare concerns. While this system has shown much promise in improving welfare, there have been problems for institutions unable to attract enough voucher-assisted consumers to ensure their survival. In this context, the authors examine major social programmes such as food stamps, primary and secondary education, post-secondary education, labour market training, childcare, healthcare, legal aid, low-income housing, long-term care and pensions.
